Claim Objections

Claim 31 is objected to because of the following informalities: All of the compounds in this claim are on separate lines except the seventh and eighth species. Consistency is requested so as to avoid errors when printing the patent. Applicants are requested to rewrite these compounds on different lines because it is confusing to tell when one compound ends and the other begins. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 31 is rejected under 35 U.S.C. 102(b) as being anticipated by Miller et al. (J. Med. Chem. 2000, 43, 22-26). The claim reads on the compounds 4-7 in Table 1 of page 24 of the reference.

Claims 1-11, 16-19, 21-23 and 27 are allowed.
